

Contents

Section 1

Overview	5
1. Introducing Percent	6
2. Rate and Unit Price	10
3. Ratio and Rate	14
4. Relating Fractions to Decimals, Percents, Rates and Ratios	18
5. Adding and Subtracting Decimals	22
6. Multiplying and Dividing Decimals	26
7. Estimating Answers to Operations with Decimals	30
8. Calculating Percents	34
Midway Review	38
9. More Operations with Decimals	42
10. Equivalent Fractions, Simplifying and Comparing Fractions	46
11. Adding and Subtracting Fractions with Like Denominators	50
12. Adding Fractions with Unlike Denominators	54
13. Subtracting Fractions with Unlike Denominators	58
14. Multiplying Fractions by Whole Numbers	62
15. Dividing Whole Numbers by Fractions	66
16. More Operations with Fractions	70
Final Review	74

Section II

Overview	79
Review	80
1. Operations with Whole Numbers	84
2. Decimals	88
3. Integers and Number Theory	92
4. Percent	96
5. Fractions	100
6. Rate and Ratio	104
7. Time, Distance and Speed	108
Progress Test	112
8. Perimeter and Area	116
9. Volume and Mass	120
10. Symmetry, 2-D and 3-D Figures	124
11. Transformations and Coordinates	128
12. Patterns and Simple Equations	132
13. Data and Graphs	136
14. Probability	140
Final Test	144

Section III

Overview	151
1. Mixed Operations with Whole Numbers	152
2. Multiples and Factors	156
3. Addition and Subtraction of Fractions	162
4. Addition and Subtraction of Decimals	166
5. Multiplication and Division of Decimals	168
Midway Review	172
6. Operations with Decimals	176
7. Percent, Decimals and Fractions	180
8. Ratio and Rate	184
9. Patterns	188
10. Equations	192
Final Review	196

Section IV

Overview	201
1. Units of Measure	202
2. Operations with Money	204
3. Time, Distance and Speed	208
4. Perimeter and Area	210
5. Volume	214
6. Two- and Three-Dimensional Figures	218
Midway Review	222
7. Coordinates	226
8. Transformations	230
9. Graphs	234
10. Analysis of Data	238
11. Probability	242
Final Review	246

Patterns and Simple Equations

Sarah writes some patterns and asks Sunita to describe the rules and give the next 3 terms in each pattern. Help Sunita with her task.

Examples

- ① Continue the pattern 5, 6, 8, 11, ... ② Continue the pattern 4, 9, 19, 39, ...

$$\begin{array}{ccccccc} 5 & , & 6 & , & 8 & , & 11 \\ \curvearrowleft +1 & & \curvearrowleft +2 & & \curvearrowleft +3 & & \curvearrowleft +4 \\ & & & & \curvearrowleft +4 & & \curvearrowleft +5 \\ & & & & & & \curvearrowleft +6 \end{array}$$

Rule : The numbers increase by 1 more each time.

$$\begin{array}{ccccccc} 4 & , & 9 & , & 19 & , & 39 \\ \curvearrowleft 4x2+1 & & \curvearrowleft 9x2+1 & & \curvearrowleft 19x2+1 & & \curvearrowleft 39x2+1 \\ & & & & \curvearrowleft 79x2+1 & & \curvearrowleft 159 \end{array}$$

Rule : Double the previous term and add 1.

- ① 100, 98, 94, 88, ____, ____, ____, ...

Rule : _____

- ② 1, 2, 6, 24, ____, ____, ____, ...

Rule : _____

- ③ 50, 48, 51, 49, ____, ____, ____, ...

Rule : _____

- ④ 5, 9, 17, 33, ____, ____, ____, ...

Rule : _____

- ⑤ 1, 4, 9, 16, ____, ____, ____, ...

Rule : _____

For each set of numbers, write the rule that relates the first two columns to the third. Then follow the rule to write another set of numbers in the boxes.

⑥

5	9	13
8	4	11
7	10	16

⑦

18	3	7
20	4	6
15	5	4

⑧

4	3	10
5	6	17
7	4	15

The data in each table follow a pattern. Complete the tables and answer the questions.

- ⑨ Population of Markville

a.

Year	1980	1985	1990	1995		
Population in thousands	69	77	89	105		

- b. In which year will the population be 177 000? _____

- ⑩ Cost of a movie ticket

a.

Year	1995	1996	1997	1998		
Amount (\$)	6.00	6.50	7.50	8.00		

- b. How much was a movie ticket in 2001? _____

- ⑪ Mass of a new born baby

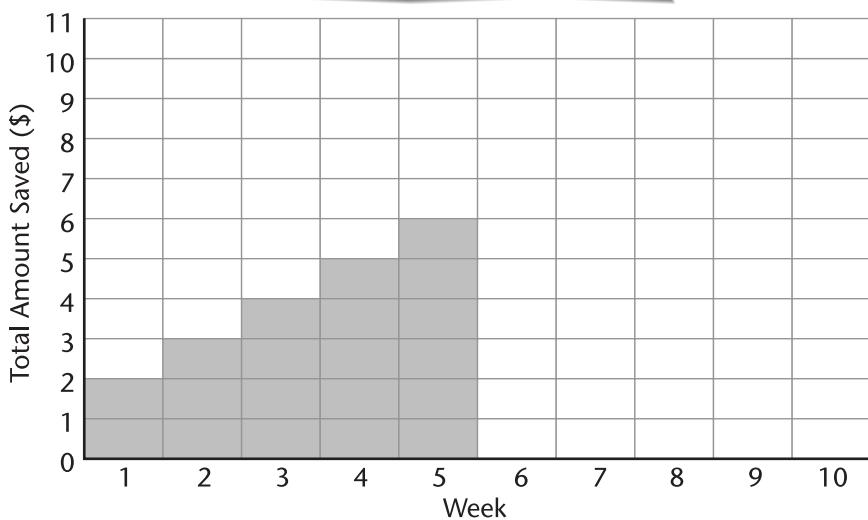

a.

Age (month)	0	1	2	3			
Mass (kg)	3.2	3.4	3.7	4.1			

- b. When will the baby weigh 7.6 kg? _____

John saves money according to a pattern. Complete the graph to show the pattern and answer the questions.

- ⑫ a.

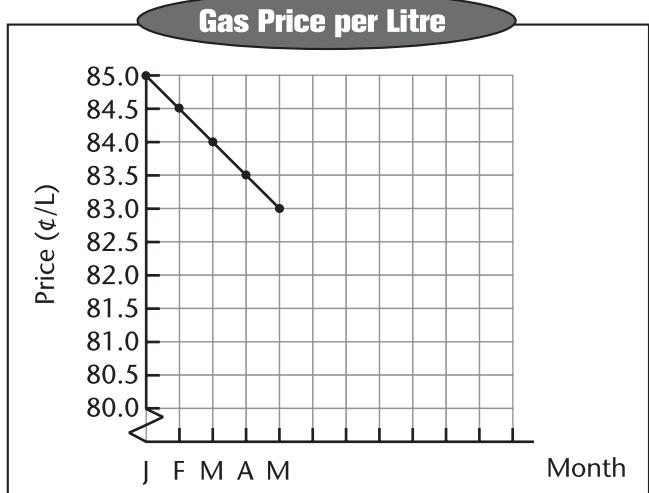

- b. How much will he save by Week 12? _____

- c. After how many weeks will there be \$20 in savings? _____

- d. Describe John's saving pattern. _____

The movement of gas price follows a pattern. Follow the pattern to complete the graph and answer the questions.

⑬ a.

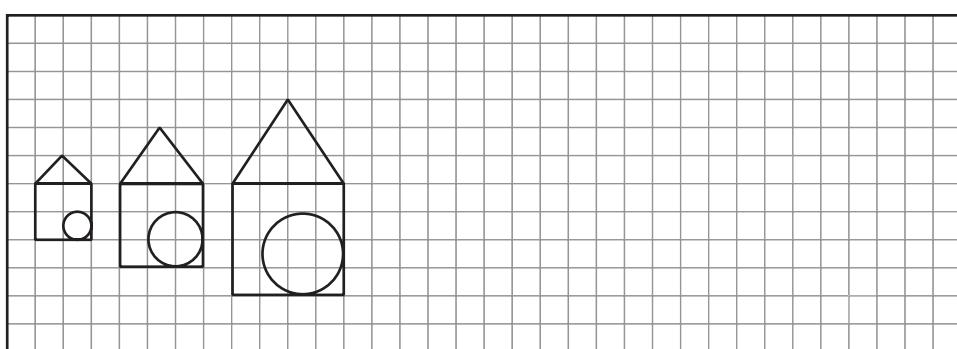

b. What will the gas price be in June?

c. When will the gas price reach 80¢?

Draw the next 2 diagrams in each pattern. Describe the changing rules for each figure.

⑭ a.

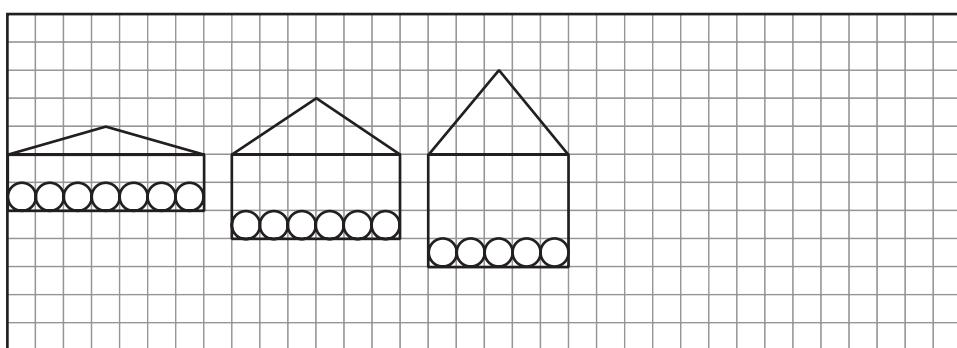

b. Triangle : _____

c. Square : _____

d. Circle : _____

⑮ a.

b. Triangle : _____

c. Rectangle : _____

d. Circle : _____

Read the number puzzles and find the numbers using the guess-and-test method.

(16)

Increase this number by 7 and then double it. The result is 70.

This number is .

(17)

The number is halved and then reduced by 20. The result is 30.

This number is .

(18)

Divide this number by 2 and then reduce it by 3. The result is 11.

This number is .

(19)

Add 25 to this number. Then multiply it by 3. The result is 120.

This number is .

(20)

This number is 7 more than half of 30.

This number is .

(21)

Half of this number is 7 more than 37.

This number is .

Determine the value of the missing number in each of the following equations.

$$(22) \quad \underline{\hspace{1cm}} - 17 = 98$$

$$(23) \quad \underline{\hspace{1cm}} + 23 = 170$$

$$(24) \quad 39 \times \underline{\hspace{1cm}} = 156$$

$$(25) \quad \underline{\hspace{1cm}} \times 13 = 117$$

$$(26) \quad 85 \div \underline{\hspace{1cm}} = 17$$

$$(27) \quad \underline{\hspace{1cm}} \div 12 = 8$$

$$(28) \quad 2 \times \underline{\hspace{1cm}} = 31 - 1$$

$$(29) \quad 5 \times \underline{\hspace{1cm}} = 8 + 92$$

$$(30) \quad 59 - 5 = \underline{\hspace{1cm}} \times 9$$

$$(31) \quad 30 - 9 = \underline{\hspace{1cm}} \times 3$$

Do the part without missing terms first.
Then 'guess and test' the missing numbers.

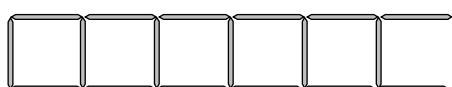

$$(32) \quad 520 \div \underline{\hspace{1cm}} = 13 + 7$$

$$(33) \quad 13 + \underline{\hspace{1cm}} = 220 \div 11$$

MIND BOGLER

**Stan uses toothpicks to make the following pattern.
Complete the table and the statement.**

No. of squares	1	2	3	4	5	6	7	8
No. of toothpicks used	4	7	10					

To make 10 squares, Stan needs _____ toothpicks.
