Popular Holdings Limited (POPULAR) is the parent company of Popular Book Company (Canada) Limited.

POPULAR began as a bookstore founded in 1924 in Singapore and has, over the years, developed into a business conglomerate that has footholds in nine countries, with more than 4,000 employees. While its core businesses remain to be book publishing, distribution, retail, and education centre, POPULAR also invests in property development and food and beverage.

POPULAR carries out its publishing activities through subsidiaries operating in Singapore, Malaysia, China, and Canada. Its bookstore operations currently have a network of over 200 locations in Singapore, Malaysia, and China.

Popular Book Company (Canada) Limited benefits from the expertise and experiences of other subsidiaries under POPULAR in publishing educational workbooks and learning resources. By working with Canadian educators, we are able to identify and develop products that are attuned to the interests and needs of the market. ■

Head Office: 15 Serangoon North Avenue 5, Singapore 554360

Tel: (65) 6462 9500 Fax: (65) 6337 1186 www.popularworld.com

POPULAR Singapore moved into the new POPULAR head office in September 2015. It is an eight-storey edifice that boasts bright and spacious rooms, recreational and relaxation facilities, and a café.

The office of Popular Canada is located in Richmond Hill, Ontario. A dedicated team of publishing professionals publishes quality workbooks to support the education in Canada.

Popular Book Company (Canada) Ltd.

Incorporated in 1994, Popular Book Company (Canada) Limited is the leading publisher specializing in educational workbooks and learning resources designed and developed by educators with the interests and needs of preschool, elementary, and high school children in mind. Through our products, we have helped young children achieve success in education. Our products for elementary school students cover key subject areas; and our products for high school students focus on building critical thinking in math; our products for preschoolers focus on cognitive and social skill development as well as basic math and language skills.

Our success began with *MathSmart*, our first-ever curriculum-based series published in 1999, with record-breaking sales exceeding 200,000 copies. Since then, the Smart products have expanded to more than 250 titles, anchored by *Complete Canadian Curriculum*, *Complete MathSmart*, *Complete EnglishSmart*, *Complete FrenchSmart*, and *Complete ScienceSmart*. To date, the anchor series have sold 3 million copies combined and have earned us a reputable household name – the Smart company.

With the advance in technology, our effort is no longer confined to print media. Since 2012, we have also published interactive workbooks to provide children with a more engaging and instantaneous learning experience.

To learn more about us and our wide range of workbooks and learning resources, please visit our website at www.popularbook.ca. ■

Popular Canada: Market Leader of Children's Workbooks

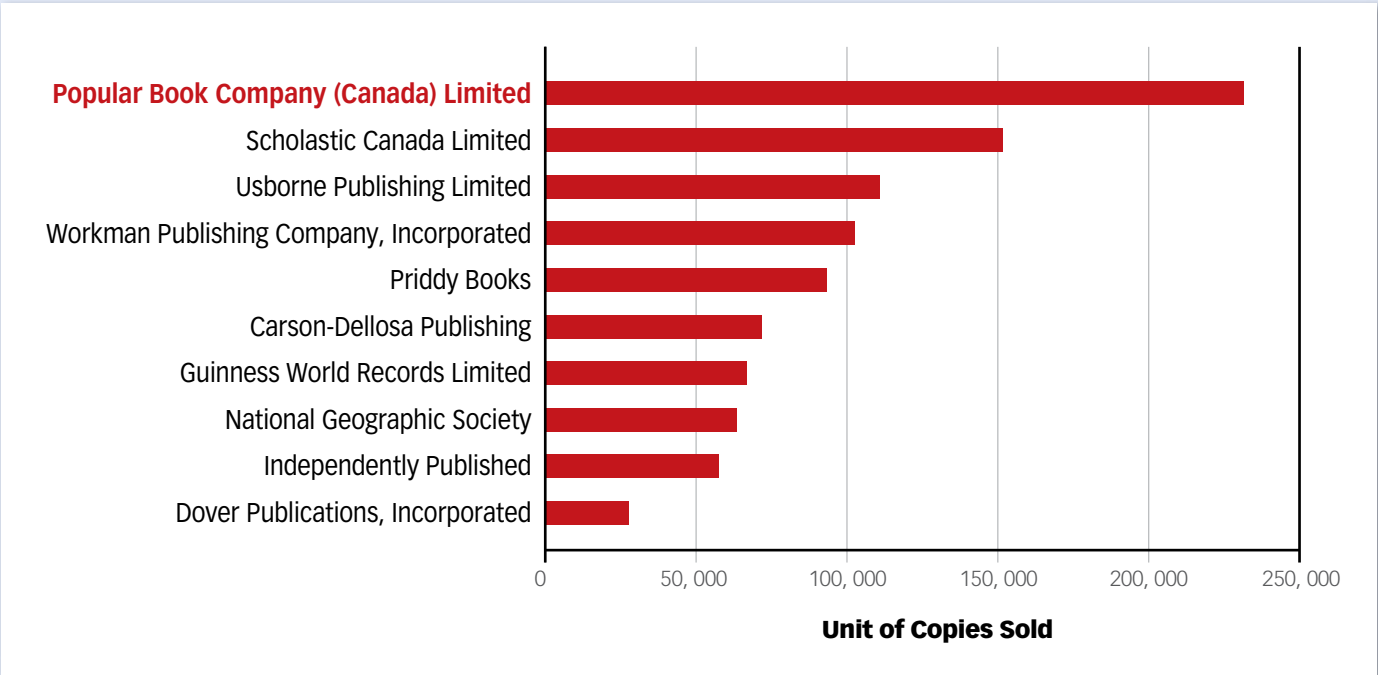

The Canadian book market has been getting more and more challenging for some time. The evolution of e-books has led to decreased demand for printed books – something that the pandemic has made worse.

However, Popular Canada had an edge. Thanks to our existing presence and the promotional activities on our website and social media, Popular Canada was able to get the attention of consumers and meet the skyrocketing demand for our educational products due to the rise of online learning and homeschooling.

Popular Canada Tops the Children's Non-fiction Book Market in 2021

Throughout 2021, Popular Canada continued to be a bestselling publisher in this sector, selling close to 250,000 copies of educational workbooks. Although this represents a decline when compared to prior years due to the impact of the COVID-19 pandemic on retail, Popular Canada will continue its commitment to helping educate the children of Canada.

2021 Top 10 Canadian Children's Non-fiction Book Publishers (Units Sold)

Popular Workbooks – the #1 Choice of Canadian Parents and Students

Popular Canada publishes seven of the top ten bestselling workbooks in Canada. Our *Complete Canadian Curriculum* (CCC) series, available from Preschool to Grade 8, continues to be the bestselling workbook series across the country. As a staple in Canadian education, CCC, together with our other quality series, has turned Popular into a household name in the Canadian market, and our workbooks remain the #1 choice of parents and students.

Robust and User-friendly Website, Digital Resources, and Social Media Presence

Popular Canada’s website (www.popularbook.ca), as our e-commerce platform, offers seamless and easy access to order and purchase all of our titles. With our mission of making learning fun and rewarding for children across Canada and helping them achieve academic success in mind, we also provide a wide variety of bonus digital resources that are aligned with our printed products on our website. The QR codes on these products are linked to our website, giving learners quick access to our suite of online resources, including bonus practice, activities, experiments, audiovisual fun, and much more, to enrich their learning experience.

Our presence on social media, including Facebook and Instagram, allows us to connect with children, parents, and educators alike by providing them with updates of our products, and the educational information and resources they need for the future success of Canadian children.

@PopularBookCanada

@PopularBookCanada

The ongoing COVID-19 pandemic has created unimaginable challenges for everyone around the world. Children have been hit hardest – school closures forced children to learn remotely, disrupting their studies and leading to huge learning loss. Although schools have reopened and in-person classes have resumed, students across the country have shown significant declines in their academic performances. For many, they lost the knowledge and skills they had previously acquired. They also missed out on learning, not to mention mastering, the essential skills that they should have gained in the previous year, when they had to learn virtually. This learning gap has prevented them from moving forward, as they are not academically ready for the new school year.

Catch up and Unleash Your Potential with Canada's Top Educational Partner!

At Popular Canada, we aim to develop quality workbooks to help close the gaps in students' learning so they can catch up and keep moving forward, and be able to learn with confidence. We want children to get the best out of our products and unleash their potential so they are able to turn any challenges into strengths.

Although the impact of COVID-19 reaches far beyond the pandemic itself, our commitment to creating high-quality Canadian curriculum-based workbooks will continue to thrive. We would like to express our greatest gratitude to our warehouse, retailers, buyers, and workers in essential retailers. Together, they made our quality workbooks available at essential stores to all students, parents, and teachers during this turbulent time. Our dedicated publishing team will continue to work tirelessly to provide Canadian children with the most updated and enriched workbooks to make learning fun and rewarding.

Catch up and unleash your potential with us!

- easy-to-understand explanations and examples
- QR codes which bring students to educational videos online (Grades 1 to 8)

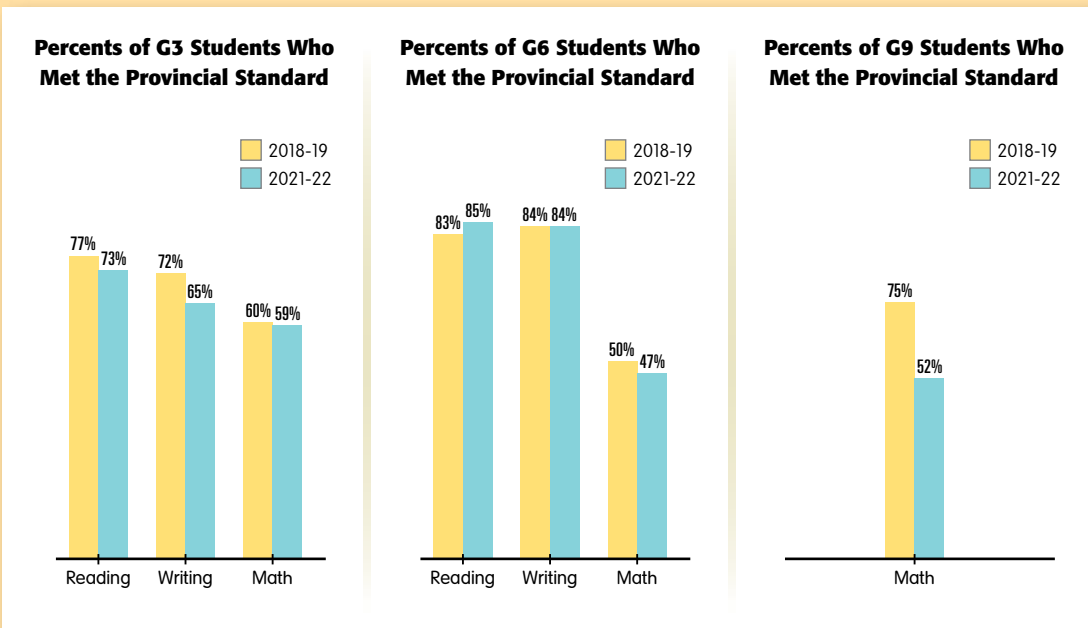

Canada's Academic Performance on the Decline

From lockdown to school closures to mental health struggles, the COVID-19 pandemic has had strong impacts on the youngest generation. All schools and child care centres were closed at the beginning of the pandemic. Virtual learning was in place; however, many students did not seem to be engaged in it. During the two years of school closure and reopening, various models of educational delivery were instituted – fully-remote, blended, and face-to-face learning. All these models did not get children actively engaged or help them maintain the required levels. Evidence has proved that school closures impacted children's academic achievement and led to learning loss. Overall, the impact on their mathematics performances is the most significant.

Due to the delay of the assessments in different provinces and territories, only the results from the Education Quality and Accountability Office (EQAO) are currently available.

Ontario

This is the first year since the pandemic that students could take the standardized tests held by the EQAO. Across the board, student performance results in math in 2021-2022 were lower than the results from the previous tests in 2018-2019.

*Ontario data from eqao.com

The pandemic has had devastating impacts on learning. Let's work together by providing more quality learning materials, such as workbooks and reading materials, accessible to children to help them catch up and unleash their learning potential!

clear diagram to help understand the key concept

Chapter 1
Investigating Relations

1.1 The Cartesian Plane

Key Ideas

The Cartesian plane, also known as the xy-plane, has two perpendicular lines that intersect at the origin. The horizontal line is called the x-axis and the vertical line is called the y-axis. The axes cut the plane into four sections called quadrants. The quadrants are labelled I, II, III, and IV.

Coordinates of a point (x,y)

Each point on the plane can be identified by an ordered pair of numbers in the form of (x,y). These are called coordinates. The first number is the x-coordinate and the second number is the y-coordinate.

Examples

No. of quadrants on the plane: 4
 Points in Quadrant IV: D
 Points on the x-axis: B
 Points on the y-axis: C
 Coordinates of A: (3,2)

Practice

Find the coordinates of the points on the plane and plot the points. Then answer the questions.

a. Coordinates of the points:
 A _____ B _____
 C _____ D _____
 E _____ F _____
 G _____ H _____
 I _____ J _____
 K _____ L _____

b. Plot the points.
 M(5,2) N(3,-4)
 O(-3,-3) P(1,-6)
 Q(-5,4) R(1,3)
 S(-1,0) T(0,-5)

c. Points that have "3" as their x-coordinate: _____
 d. Points that have "-4" as their y-coordinate: _____
 e. Points that lie on the x-axis: _____
 f. Points that lie on the y-axis: _____
 g. Points that are in Quadrant II: _____
 h. Points that are in Quadrant IV: _____

Points (x,y)	Quadrant I	Quadrant II	Quadrant III	Quadrant IV
x-coordinate (positive/negative)		negative		
y-coordinate (positive/negative)		positive		

simple and clear example

meaningful activity to reinforce concepts

curriculum-based content

Chapter 7

Determine the direction of opening and y-intercept of the parabola of each quadratic relation. Then do the matching and write the letters in the circles.

Quadratic Relation **Direction of Opening** **y-intercept**

1. $y = x^2 + 2x + 1$ _____ _____

2. $y = 2x^2 - x + 1$ _____ _____

3. $y = -2x^2 + 2x + 1$ _____ _____

4. $y = -\frac{1}{2}x^2 + x - 1$ _____ _____

Hint
 The standard form of a quadratic relation is $y = ax^2 + bx + c$.
 Standard Form: $y = ax^2 + bx + c$
 If $a > 0$, opens upward.
 If $a < 0$, opens downward.

Find the axis of symmetry with the given quadratic relations in a standard form. Then answer the questions.

1. $y = x^2 + 2x + 5$ axis of symmetry: _____

2. $y = 2x^2 + x - 6$ axis of symmetry: _____

3. $y = \frac{1}{2}x^2 + 3x + 2$ axis of symmetry: _____

4. $y = -\frac{1}{2}x^2 - 6x + 1$ axis of symmetry: _____

Hint
 The value of a and b in the standard form can be used to determine the axis of symmetry.
 $x = -\frac{b}{2a}$
 ex. $y = 2x^2 + 4x - 1$
 $x = -\frac{4}{2(2)} = -1$

5. The standard form of a quadratic relation is given. Can the coordinates of the vertex be found? Describe your reasoning. If it can be found, find the vertex of $y = 2x^2 + x - 1$.

Answer the questions.

1. For each graph, identify the axis of symmetry, vertex, zeros, and y-intercept.

2. Determine whether each table of values represents a quadratic relation. If yes, determine the direction of opening.

3. Sketch the graphs with the given properties.

4. A quadratic relation has zeros at (0,0) and (5,0). Its second differences are positive.

5. A quadratic relation only has one zero at (5,0). Its second differences are negative.

6. Determine the direction of opening, y-intercept, and axis of symmetry of each quadratic equation in standard form.

7. Parabolas are not just present in the study of mathematics, there are also many examples in real life. A stream of water from a fountain often creates an arch that is parabolic in nature. Many architectural designs incorporate arches, which resemble parabolas. Scan the QR code to learn more about examples of parabolas.

Out Loud Series (Ages 0 and up)

Provide children with fun ways to learn basic concepts by reading aloud!

FEATURES

Five Cheeky Monkeys

- introduces counting up to five with the cheeky monkeys in the supermarket while the trolley "fills" with food at the turn of a page
- assists children in recognizing and counting items such as fruits and vegetables up to five

Rainbow, Rainbow

- introduces children to the concept of colours by having them identify the colours of the rainbow using coloured items

Suzie's Surprise!

- helps children identify shapes in their surroundings as they join Suzie on an exciting day to identify the shapes of various objects

Dinosaur ABC

- introduces children to the alphabet and lets them know the letter formation by finger tracing trails with lovely dinosaurs
